Undergraduate Scholarly Habits Ethnography Project
Student In-Person Technology Survey Protocol

Between 10-15 students at each college participated in a brief interview about their technology ownership, access, and use for their academic work. Researchers set up a table in high-traffic areas on campus and recruited students as they walked by the table.

Questions included:

- What kinds of mobile technology do you own or have access to?

- Do you use any of that technology for your schoolwork? In what ways?

- What kinds of college-provided technology do you use on campus? And where?

- What kinds of technology do you have access to at home?

- Do you use any of that technology for your schoolwork? In what ways?

- Do you have access to the internet at home?

- Do you have access to technology in a private space, or a shared space?

- What frustrates you most about the technology you use for your schoolwork?

- If you could wave a magic wand to make your technology better, what would it be?

- Is there anything else you'd like to share with us about how you use technology for your schoolwork?

- And finally, we have a few questions about you:
    - What's your program of study/major?
    - How many semesters have you been in college?
    - Are you going to school full time or part time?
    - How old are you?
    - Gender
    - Ethnicity
